Rotor/Shafts used prior to Feb 2013

The current R/S 265703 has a small step where the rotor meets the shaft. This step includes two notches to receive the seal drive tangs. Previously, a separate spacer (375701) was used. This spacer must be used with older shafts. If a new R/S 265703 is used in an older pump, discard the spacers.
